

SAVE ON TURNING INSERTS

TRY OUR NEW GRADES AND GET 50% OFF A 10-PACK

NEW TH1000 & TH1500

TH1000 is a grade that features extremely high wear and deformation resistance, ideal for turning steels whose hardness is between 40 and 62 Rc. It utilizes a TiSiN-TiAlN nanolayer PVD coating which enhances edge toughness and results in improved surface finish.

TH1500 is a very hard grade that incorporates Duratomic™ coating technology and is ideal for machining hardened steels in continuous cut applications. A hard but versatile grade, TH1500 has a thick coating for long tool life in a broad range of steels and cast irons.

NEW TP1020 & TP1030

Ease of use has been key during the development of the new uncoated TP1020 and the PVD-coated TP1030 cermet. TP1020 is ideal if you want reliability and control in surface finish critical applications. The nanolaminate PVD-coated TP1030 cermet grade adds a new dimension to versatility and predictability. It also withstands considerably higher feeds and speeds, achieving higher productivity demands while retaining high tolerance and surface finish requirements.

NEW TP3500

Offers long, predictable tool life in unstable conditions where high edge security is needed and harder, more wear resistant grades show unpredictable behavior. Also offers a level of toughness suitable for ISO M applications. For applications where harder and more wear-resistant grades show unpredictable behavior, TP3500 is a top performer that will increase your productivity.

NEW TP0500

TP0500 is an exceptional new grade for those cases where an extraordinary amount of heat resistance is required. This grade is the market leader when it comes to wear resistance in harder steels and cast irons and when time in cut is long.

FOR A LIMITED TIME ONLY: 50% OFF ANY TURNING 10-PACK

Seco Tools has an established reputation as a leading manufacturer and supplier of carbide cutting tools and associated equipment. The range of coated and uncoated turning inserts, comprises of more than 4000 standard inserts and more than 2000 toolholders. These products represent one of the most comprehensive ranges available on the market.

Purchase any 10-pack of turning inserts for 50% off! This offer is only available through the end of 2011.

Long, predictable and increased tool life summarizes the grades in the Seco assortment of turning grades. Seco's α -based Duratomic cutting tool technology, which is not available from any other supplier, has an extreme level of both toughness and wear resistance. This improvement has evolved coated turning inserts dramatically and will make it the easy first choice in over 80% of steel and stainless steel turning applications.

In addition to the superior grades offered from Seco, many styles of chipgrooves are available for applications from light finishing to heavy roughing – a solution for every machining application.

SAVE EVEN MORE WITH PRODUCTIVITY KITS FROM SECO

Kits that include tools for turning in all materials, for high-feed and Multi Directional Turning as well as the innovative Jetstream Tooling™ are available with a choice of insert grades offering even greater savings.

This offer is only valid through 12-30-2011.
